

Environmental Policy Statement

South East Solar & Electrical recognises that in our operations, we inevitably impact on the environment and thus are committed to minimise the potentially harmful effects of such operations wherever and whenever possible.

To confirm the above commitment, company management have developed a comprehensive policy statement, appropriate to our operations. This policy enables us to set objectives towards sustainable environmental improvement which can be measured and monitored regularly and in turn contribute to prevention of pollution and future protection of the environment. All employees are encouraged to understand and implement the objectives of this policy in their day to day work through regular discussion, communication and training.

South East Solar & Electrical is committed to minimising the impact of its operations on the environment and by means of a programme of continual improvement is committed to:

- Continuous improvement of the Environmental Management System to enhance environmental performance
- Protection of the environment by managing the aspects and impacts within the business
- Prevention of pollution
- Commitment to fulfill its compliance obligations
- Provide a framework for setting environmental objectives
- A policy that is documented, implemented, maintained and communicated to all employees and interested parties

South East Solar & Electrical will:

- Ensure appropriate resources will continually be made available to ensure the environmental policy is implemented in full
- Discuss environmental issues with all employees, conduct training programmes and encourage best implementation practice by all personnel
- Meet and where appropriate, exceed the requirements of all relevant legislation
- Work with our suppliers and sub-contractors to minimise the impact of their operations on the environment.

In addition, South East Solar & Electrical will seek to reduce the following:

- Consumption of materials in all operations, re-use rather than dispose wherever possible, and to promote re-cycling and the use of re-cycled materials
- Whenever and wherever practicable the level of pollution and harmful emissions
- Noise, visual and other impacts on the local environment

Regular review and monitoring of environmental performance will be actioned to ensure our environmental objectives and targets as described above are maintained at all times.
